Its Healing Power Is Marvelous.

Is acute inflammation and swelling of the Olfactory organ which contains the Nerves of Smell. This organ is a long ribbon-like membrane and hangs from the roof of the Nasal passage in felds, as seen in Fig. 3. When this condition becomes chronic, or permanent, it is called CATARRH. The folds become swellen into a solid mass, so the air in breathing cannot circulate between them; hence the loss of smell. The Catarrhal microbs anon makes its appearance, causing a multitude of small alcors between these folds.
